YULIIA ILIIENKO

SOFTWARE DEVELOPER INTERN | August 2027 – February 2028

Horsens, Denmark | +45 50 39 44 00 | juliailienko1992@gmail.com

LinkedIn: linkedin.com/in/yuliia-iliienko-988891163

Portfolio: yuliia1605.github.io/Yuliia_Iliienko/

TECHNICAL SKILLS

Programming & web: Java, OOP, JavaScript, HTML, CSS, JSON, Fetch API

Systems & data: SQL, PostgreSQL, TCP sockets, client-server architecture, MVVM, multithreading

Engineering & testing: Git, UML, SOLID, design patterns, Scrum, JUnit, unit testing

Currently studying: C#/.NET, Python, distributed systems, Spring/Spring Boot, REST services

LANGUAGES

Ukrainian: Native

Russian: Fluent

English: University studies in English

Danish: PD3 completed; able to communicate on everyday topics

ADDITIONAL EDUCATION

HTML/CSS/JavaScript online course (2024)

Ukrainian upper secondary education (2009; assessed at Danish HF level)

PERSONAL INFORMATION

Married; one child | Born: 16.05.1992

HOBBIES & INTERESTS

Family time outdoors, forest walks and cycling. Travelling to discover new countries, cultures, cuisines and perspectives. Exploring Danish culture and everyday life.

PROFILE

Third-semester Software Technology Engineering student at VIA University College with two completed semesters of team-based development projects. Contributed code, UML diagrams and technical documentation across Java applications, client-server systems and web development. I'm interested in exploring different areas of software engineering, from frontend and backend development to databases and software testing, and I'm open to new challenges that will help me discover my strengths and grow as a developer. Eight years in Danish workplaces have strengthened my teamwork, adaptability and understanding of Danish working culture; I have also completed Danish PD3. Seeking to contribute as an intern while developing toward a long-term software engineering career.

EDUCATION

VIA University College, Horsens | Software Technology Engineering

Aug 2025 – Dec 2028 (expected)

Completed: Programming, Software Engineering, Databases, Web Development, Networking, Software Testing.

Current: Distributed Systems, C#/.NET, Algorithms & Data Structures, REST Services, Spring/Spring Boot.

ACADEMIC PROJECTS

Aurora Cliffs Hotel Management System

2nd semester | Java, JavaFX, PostgreSQL, TCP, MVVM, JUnit

Purpose: Help hotel staff manage reservations, guest information and daily operations through a centralized system.

Contributed Java code to a multi-client hotel system using TCP and PostgreSQL; created UML diagrams, documentation and participated in testing.

GitHub: Aurora Cliffs repository

Cloverville Sustainability Management System

1st semester | Java, JavaFX, HTML, CSS, JavaScript, JSON

Purpose: Support sustainable community management with an administration tool and an informative, user-friendly website.

Contributed application and responsive web code; created and refined UML diagrams and technical documentation with teammates.

GitHub: Cloverville repository

Cinema Management System

3rd semester | In progress | Java, C#, Git, distributed systems

Purpose: Organize student-only campus screenings, enabling film voting and seat reservations while administrators manage film choices, schedules and locations.

Working with teammates on a distributed system for student voting, reservations and cinema administration; exploring server-to-server communication and database integration.

PROFESSIONAL EXPERIENCE

DENMARK | Nov 2017 · Aug 2025

Operational and Warehouse Roles · Eight years in Danish and multicultural operational environments.

UKRAINE | Dec 2014 · Nov 2015

Technical Department Assistant, Ukrainian Railways · Supported daily department activities; earlier apprenticeships in 2013 and 2014.
